WEST KENT CARDIOLOGY - PATIENTS' COVID-19 (CORONAVIRUS) UPDATE

9th April 2020

Dear West Kent Cardiology patients,

Patient and staff safety is our prime concern at West Kent Cardiology Partnership and we are, therefore, changing our standard operating procedures following recent Department of Health advice to minimise infection risk. We will remain open to answer patient enquiries and queries and our Consultants will be happy to arrange phone consultations whilst the current Covid-19 restrictions apply. Currently therefore our services can be summarised as:-

1. Telephone consultations include a detailed discussion of your symptoms and a proposed investigation/treatment plan. This would not, however, include any cardiac investigations (e.g. ECG, echocardiogram, heart monitors etc.) at the time of the consultation. These may be required at a later date and planning for this would be discussed with you at the end of your telephone consultation. Telephone consultations are charged at our normal consultation rates.
2. Whilst we normally prefer patients to have a GP referral letter, we understand that it may be difficult for you to obtain an appointment at your GP surgery currently. If you are worried about your heart, therefore, we are currently happy to provide consultations without a GP referral (NB if you are using private medical insurance we recommend that you advise your insurer of the situation prior to your consultation).
3. We plan to reduce the number of staff working on-site at Warwick Park Consulting Rooms. Our administration team, will however, continue to work remotely from home when not on site, have access to your records and be fully contactable using our normal phone number (01892 526726) and/or our usual email address (info@wkcardiology.co.uk). We will, therefore, be able to help you in the usual way with any queries you may have and to ensure that all correspondence with your GP and yourselves is typed and emailed out promptly.

We would respectfully request your assistance by NOT attending the practice should you have any symptoms of possible Coronavirus infection, if have been in contact with anyone with the virus or have recently travelled abroad to high-risk areas. Full details of the symptoms and Government guidelines can be found on:-
